Dr. Henry J. Heimlich
President, The Heimlich Institute
Professor of Advanced Clinical Sciences
of Xavier University
P.O. Box 8858
Cincinnati, Ohio 45208

Dear Dr. Heimlich:

Thank you for your letter of March 25, 1987 providing an update on progress in your proposed study of the potential therapeutic role of malaria therapy in cancer patients. I am pleased that you have been able to make arrangements for your studies and hope that you are successful in obtaining the necessary grant support. I appreciate your keeping us informed and we will, of course, be willing to assist you in identifying sources for the appropriate strains of malaria parasites and advice on the management of patients with induced malaria.

With best regards.

Sincerely yours,

Robert L. Kaiser, M.D.
Director
Division of Parasitic Diseases
Center for Infectious Diseases
